\$990

**Add PocketMaint Lite -
Optional PDA Module**

MAPCON *Lite*

The **MAPCON Lite™ PM and Work Order System** includes Dispatching, Human Resources, Equipment Management, Equipment Meters & Gauges, Memo Inventory, Inventory Issues, Location Management, Manufacturers, PM Procedures, PM Scheduling, PM Work Order Generation, Requisitions, Reporting, Safety Procedures, Service Contracts, Vendors, Work Requests and Work Orders. It is a full featured Preventive Maintenance and Work Order Control System.

Advanced Inventory Option \$125

Advanced Inventory supports Standard or Running Average methods. It includes Inventory Issues that can be charged to Work Orders, Equipment, Locations, or Charge Codes. A Cycle Count system provides for Inventory Reconciliation.

Purchasing Option \$125

The Purchasing System includes Purchase Requisitions, Purchase Orders, Receiving and Invoice reconciliation. The Purchasing System is totally integrated with Work Orders, Advanced Inventory and Costing. Purchase Requisitions and Purchase Orders can be charged to Work Orders, Equipment, Locations or Charge Codes.

Costing Option \$125

Costs are categorized by Labor, Inventory, Purchases, and Services. They are kept for the Current Period, Year to Date and Lifetime of the Equipment or Locations and their associated Cost Centers and Departments. Each combination of Cost Center and Department can be mapped to a Ledger Account. Also, Charge Codes can be used to charge maintenance costs directly to a Ledger Account.

Timecard Option \$125

Timecards are used to charge labor to Work Orders, Equipment, Locations or Charge Codes. Labor costs will be based on the hours worked, the Employee's pay rate (including overtime rates) and a burden specified by the System Administrator. Without Timecards, labor costs are based on Skill Code rates.

Security Option \$125

System Administrator establishes a Security Profile for each user of Mapcon Lite. The User's Security Profile is checked when the User logs in. The User has access to the system's Menus, Screens, and Fields as specified by the Security Profile.

Report Writer Option \$249

The Report Writer can create lists, print labels using Avery formats, and produce desktop publishing quality reports, which can also be e-mailed.

PDA Option \$295 or \$795 with Handheld PDA

PocketMaint Lite provides mobile data gathering and helps reduce or eliminate paperwork. Use any PDA with Pocket PC technology to improve data accuracy, plus increase "wrench time" and productivity.

Service Billing Option \$249

Service Billing is useful for those who provide maintenance for another company or for rental properties. Features a monthly Service Invoice.
