

MAPCON

**Pocket
Maint**

Portable Data Assistant Module

Key areas in your organization can use **MAPCON PocketMaint™** to achieve a truly paperless maintenance/work order system! Generate paperless work requests, complete work orders, and count parts *on the move!* Dramatically improve timeliness of data flow into MAPCON.

WIRELESS OR BATCH

PocketMaint is available in two modules, *Batch Update* or *Wireless*. Both provide convenient mobility with any PDA using the Microsoft Pocket PC platform with full color screens. Login and Menu level security on Wireless Module limits user access and activities. Combine either system with barcode scanning to increase speed and accuracy.

WHY USE *PocketMaint*?

- ⇒ Reduce or eliminate paperwork
- ⇒ Improve data accuracy
- ⇒ Increase “wrench” time and productivity
- ⇒ Perform physical inventory counts faster
- ⇒ Reduce labor and equipment costs

WHY USE THE *Wireless Module*?

- ⇒ Save time by viewing entire repair history of equipment from job-site
- ⇒ Create custom Lookups to find info fast
- ⇒ Run user-created reports on the fly
- ⇒ Wireless LAN connectivity provides up-to-the-minute data flow between the point of activity and MAPCON
- ⇒ Cellular connectivity provides unlimited range

WHY USE THE *Batch Module*?

- ⇒ Timecard Tracking
- ⇒ Issue and return parts to work orders
- ⇒ Input Meter and Gauge Readings
- ⇒ Lower hardware cost
- ⇒ Unlimited range
