

iMAPCON

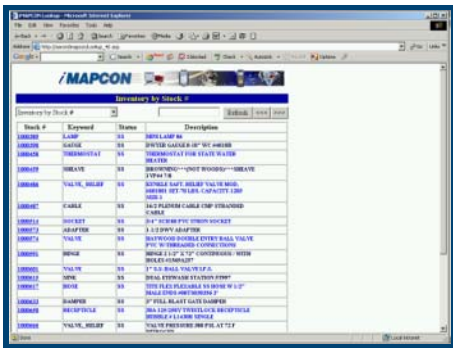

Intranet/Internet Module

Immediately bring a critical situation to the right person's attention. Use any workstation's web browser to access **iMAPCON** from any computer at any location. Avoid maintenance delays with this paperless system!

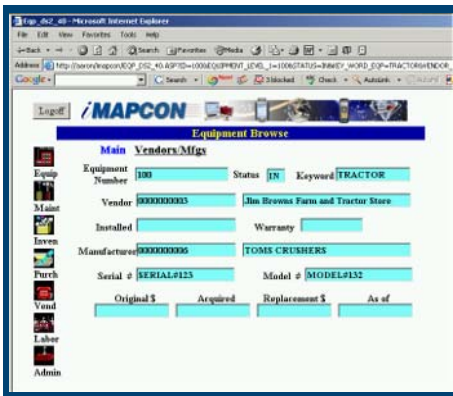

WORK REQUESTS AND ORDERS

Anything that requires attention can be entered in **iMAPCON** from any web browser as a work request. Users can easily check on the status of their requests, and authorized users can also initiate and complete work orders from anywhere using **iMAPCON**. Create "quick" After-the-Fact work orders to track whatever work has already been done.

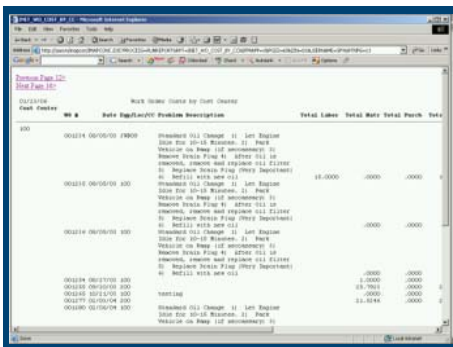

INVENTORY CONTROL

View any inventory item's status from any workstation, including quantity available and location, without taking precious time away from inventory personnel. Issue and return parts quickly and easily. Conveniently input cycle counts at a terminal near the stockroom. Need more parts? Create a purchase requisition in **iMAPCON** to order more.

REPORTS, MENUS AND SECURITY

Users can view their favorite reports from any computer. Custom menus and Lookups can be setup within **iMAPCON** to simplify user's choices, retrieve data quickly, and gain security. Integrated security protects sensitive information and allows limitations to be placed on user activity.
